# VE-240 VFFS BAGGING MACHINE

## FULLY STAINLESS STEEL, ROBUST, FLEXIBLE

Complete stainless steel construction with an advanced electronic control system complete with a robust and flexible PLC allowing the machine to accept a wide range of additional devices, inputs and outputs.

Comes as standard with forming set, hot foil printer and PEC sensor for running on printed film.

## BAG SIZES & DOUBLE LENGTH BAGS

This machine offers a large range of bag widths and lengths and it has a built in double pull function enabling the machine to make bags twice as long as standard.

## INTEGRATION WITH FILLING MACHINERY

This bagging machine can be operated manually, either by the touch screen control or via a connected foot pedal for manual filling.

It can also be connected to a range of weighing and filling machines to enable a fully automated packing operation.

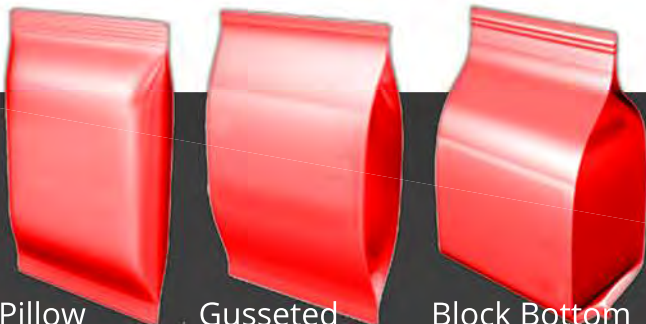

## BAG STYLES & SIZES

Makes pillow style bags as standard and optional devices can be added to create gusseted and block bottom bags.

Bag Sizes: 75mm - 240mm wide  
50mm - 300mm long (580mm with double pull)

**- VERY RELIABLE AND EXTREMELY EASY TO USE**

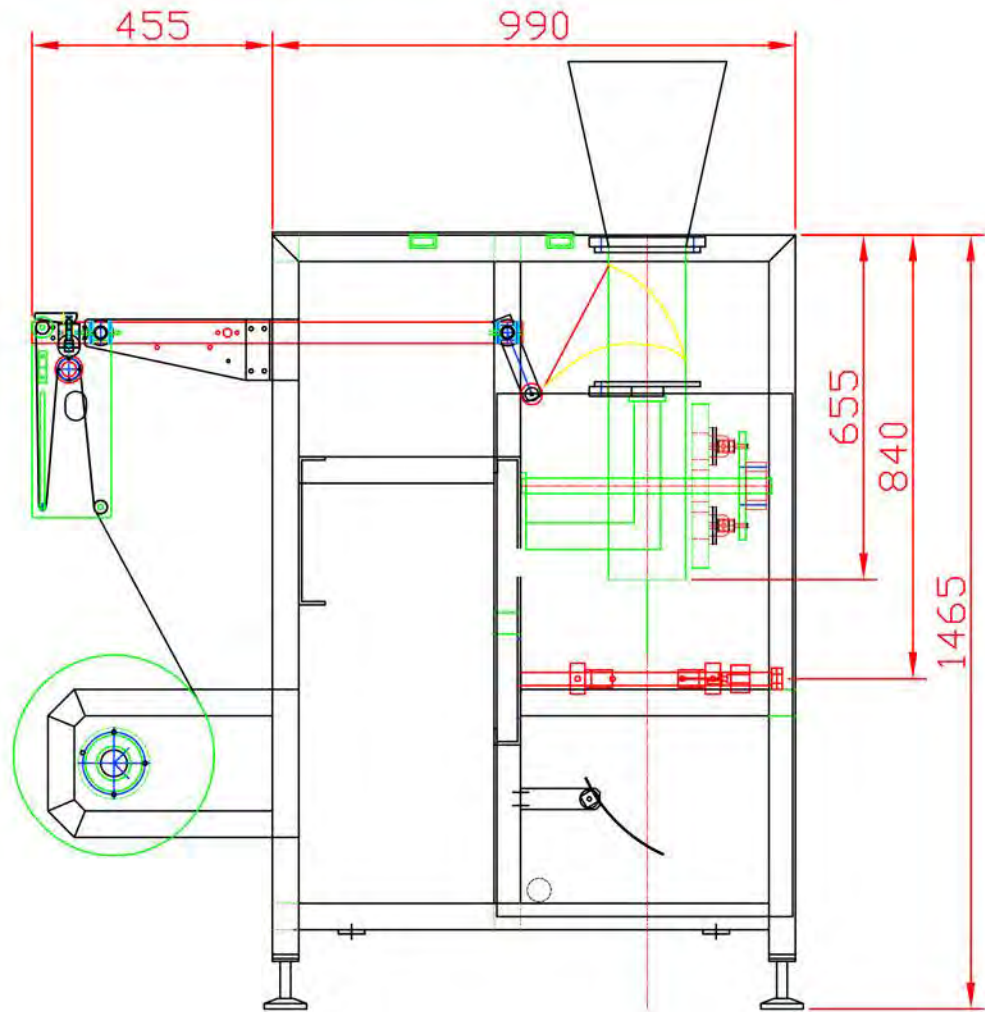

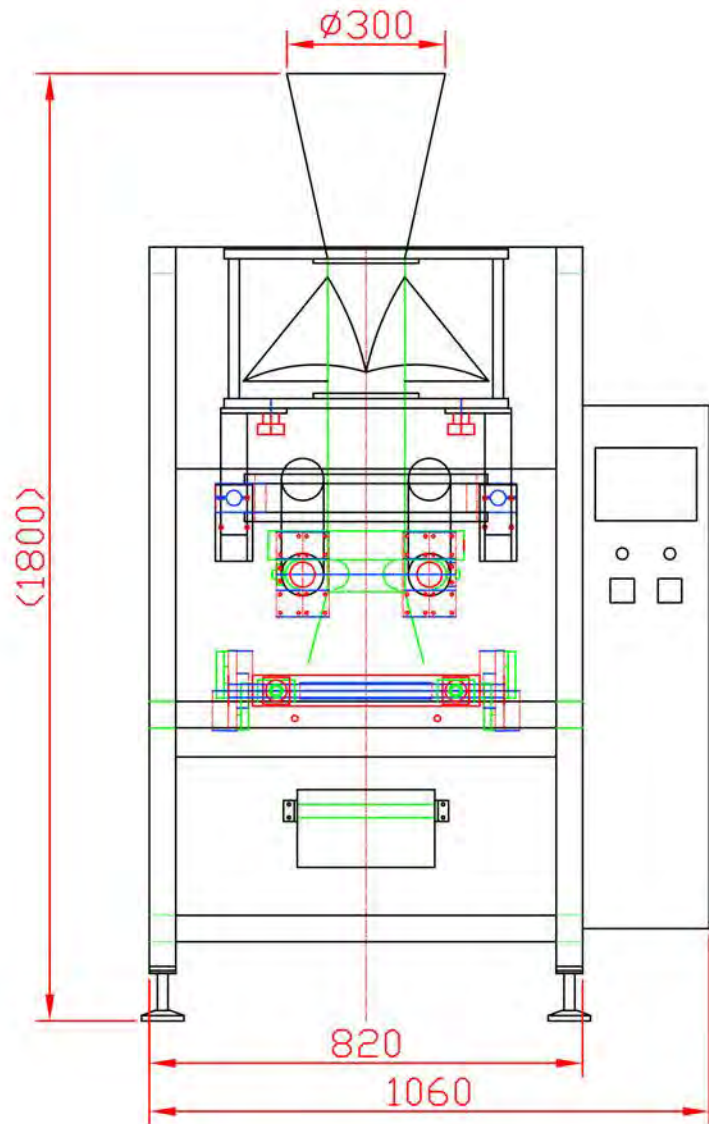

Pillow

Gusseted

Block Bottom

**12 MONTH WARRANTY  
INSTALLATION & TRAINING AVAILABLE  
FULL UK PARTS AND SERVICE**
